

The BNA has received the following input for agenda item #8a “Leaf Blowers”:

“I would like to suggest adding “Leaf Blowers” as an agenda item to the 12/2 meeting if there’s time. Specifically, is there any energy in Bryant NA to raise noise and carbon footprint mitigation with the City through either incentive or regulation as an issue. Perhaps start with a briefing from the City. I know the Sustainability Committee has had discussions on the topic in the past and held an information forum via zoom last year but do not know of any further developments, perhaps you do?”
